

Savanna CTE Course Offerings

Business Systems & Technology This is the first course you will take as a Freshmen at Savanna! It is a fun and exciting class that is a required course and is designed to enhance your knowledge of technology, cyber citizenship, career exploration, and more, in a project based learning environment. Fun, Fun, Fun!

Graphic Communication This course uses a variety of software to create multimedia productions involving desktop publishing, computer graphics, art programs, color theory, layout and design, sound missing, video photography and more!

Video Production Students will produce videos incorporating sound, animation, and special effects. Video production includes scripting, storyboarding, recording, and editing. The emphasis is on increasing students' communication skills through the use of video technology.

Broadcast Media Production Students will participate in and produce television broadcasts. Projects include live and taped broadcasts, commercials, interviews, documentaries, as well as scripting, storyboarding, editing, time and resource management and use of video/audio equipment and software. Comprehensive portfolios of work shall also be produced. The course emphasizes improving students' communication skills through broadcasting media.

Savanna CTE Course Offerings, continued

Exploring Computer Science Students will explore how to integrate hardware and software in order to solve problems. Students will see the effect of software and hardware design on the resulting product. Students will apply previously learned topics to the study of robotics. This is just one of six awesome units!

Digital Animation This course exposes students to the range of traditional and digital techniques used in stop-motion, claymation, 2-D or 3-D computer animation. Students learn basic theory and mechanics behind animation develop observational and drawing skills and study the fundamental principles of character design, layout and storyboarding.

These pathways are a sequence of classes that will prepare you for a job in an exciting technological field you choose!

**CTE!
The Way to Be!**

Career Tech Ed (CTE)

Savanna High School offers a variety of Career Technology Education Classes which lead to Career Pathway completion. These pathways are a sequence of classes that will prepare you for a job in an exciting technological field you choose! A Certificate of Completion will be yours upon completing a Pathway which will put you ahead of other students in competing in the technology job market, and possibly easier acceptance into a college as well!
